DUE IN CLASS

STUDENTS IDENTIFICATION:

Number:	Name:
102802	Fabio Mata
103392	Nuno Gongalues
102664	Pedro sousa

2.1 Simple execution, without data forwarding techniques

e) Clock cycles 18	Instructions	7		Average CPI	$\frac{18}{7} = 2.571$
--------------------	--------------	---	--	-------------	------------------------

f)	Clock cycles	174	Stalls:	- Data	101
	Instructions	61		- Structural	0
	Average CPI	2.852		- Branch Taken	8

A política de previsa de branch utilizada é "predict not taken", uma vez que após a instrução branch é executada a instrução seguinte do programa, e na a que consta no target do branch. Já que a instrução branch se situa no fim do loop o jump vai ser feito em todas as iterações excepto na última, pelo que a instrução su aperas na é anullada neste caso.

2.2 Application of data forwarding techniques

c)	Clock cycles	136	Stalls:	- Data	63
	Instructions	61		- Structural	9
	Average CPI	2,230		- Branch Taken	රි

2.3 Source code optimization: minimization of data and structural hazards

a) Attach a copy of the new assembly program.

c)	Clock cycles	118
	Instructions	61
	Average CPI	1.934

Stalls: - Data	36
- Structural	9
- Branch Taken	8

2.4 Source code optimization: loop unrolling

a) Attach a copy of the new assembly program.

c)	Clock cycles	89
	Instructions	43
	Average CPI	2.070

Stalls: - Data	57
- Structural	9
- Branch Taken	Z

2.5 Source code optimization: branch delay slot

a) Attach a copy of the new assembly program.

d)	Clock cycles	101
	Instructions	61
	Average CPI	1.656

Stalls: - Data	27
- Structural	9
- Branch Taken	Ó
